

SRIDHARSHINI S

📅 13 October 2007 ✉ ssridharshiniofficial@gmail.com ☎ 9488363352 💼 [Sridharshini-S](#) 🔗 [Sridharshini-Crypto](#)

Education

SSC (10th Grade) - Secured 95% (475/500) , <i>Raj Vidyalyaya Matric Higher Secondary School,Kuthalam</i>	2022 - 2023
HSC (12th Grade) - Secured 97% (583/600) , <i>Raj Vidyalyaya Matric Higher Secondary School,Kuthalam</i>	2024 - 2025
Bachelor of Engineering, Computer science and Engineering (Cyber Security) - Having 9.07 CGPA <i>Chennai Institute of Technology ,Kundrathur</i>	2025 - Present

Skills

Programming Languages	Development Frameworks	Development Tools	Cybersecurity
- Python - C++,C - SQL - JavaScript - Java	- React . j s - Node.js - Express.js - HTML - CSS	- Git - GitHub	- Networking - Capture The Flag (CTF)

Certificates

- Cyfrin Blockchain Basics - Cyfrin Solidity Smart Contract Development - Exploring Networking with Cisco Packet Tracer - Industrial Cybersecurity Essentials	- Introduction to Modern AI - Apply AI: Analyze Customer Reviews - Python Essentials 1 - Python Essentials 2
---	--

Projects

ReguShield — Developed an air-gapped AI compliance platform for banking systems, combining local LLMs, RAG, LangGraph, and deterministic validation to automate regulatory analysis and infrastructure compliance verification. SubAero — Developed a physics-informed digital twin for four-stage turbojet health monitoring, integrating thermodynamic modeling and white-box ML for health estimation, thrust prediction, anomaly detection, and RUL forecasting. FinSight — Developed an AI-driven financial analytics platform providing real-time transaction insights, financial behavior analysis, and intelligent banking analytics. SentinelX — Developed an AI-powered cyber fusion platform correlating cybersecurity telemetry, user behavior, and banking transactions to detect threats, fraud patterns, and coordinated attacks. TechArena — Developed a reusable technical competition platform supporting coding, debugging, quiz, SQL, and aptitude rounds with automated evaluation, scoring, and leaderboards. SECUROX — Developed an AI-driven cyber-risk intelligence platform for smart-city infrastructure, correlating financial, user, device, network, and infrastructure events to detect anomalies, identify connected cyber incidents, and generate dynamic cyber-risk scores. Multipurpose Agricultural Vehicle — Designed and prototyped a multipurpose agricultural vehicle to support various farming operations. (Hardware)

Achievements

Top 25 Finalist among 2300+ participants – HAL × IIT Indore Aerothon 2026, developing SubAero, a Physics-Informed Digital Twin for turbojet health monitoring. - Grand Finale Finalist — Smart Horizon International Hackathon 2026, selected through competitive solution screening and advanced to the international 48-hour finale. - Finalist in 2+ National-Level Hackathons, developing AI, cybersecurity, and full-stack solutions. - Microsoft Agents League – participated in a Microsoft developer challenge focused on building intelligent reasoning agents using Microsoft Foundry. - CTF Participant, actively participated in Capture The Flag cybersecurity challenges. District-Level Chess Player, representing school and demonstrating strategic problem-solving.
--

Experience

Full Stack Developer Intern — BAEONN, Singapore (Virtual Internship) Completed a virtual internship focused on full-stack web development, contributing to web-based application development and implementation.
Workshop Instructor & Technical Event Organizer Conducted a Blockchain workshop and organized multiple hackathons and technical events, demonstrating leadership, coordination, and technical communication skills.
Secretary And Documentation Lead — Club Asymmetric Contributing as a Technical Team Member, supporting technical initiatives, event execution, and development activities within the club.
